

Supplies Selection Guide

Genuine FARGO Supplies

The Card Printer Supplies People Demand

Quality. Innovation. Unmatched performance and reliability. All the advantages that have made FARGO Card Personalization Systems bestsellers worldwide make genuine FARGO supplies the best choice for your FARGO Card Printer.

From efficient, snap-in ribbons and highly secure overlaminates to attention-grabbing oversized cards, all FARGO supplies are precisely designed and rigorously tested to maximize the performance of FARGO printers. For superior print quality and enhanced security, there's simply no more reliable, more cost-effective combination.

FARGO Print Ribbons – the perfect fit

FARGO Card Printers and FARGO print ribbons are made for each other. The printer is optimized to work seamlessly with the ribbon's custom dyes to consistently produce crisp, colorful cards. Plus, FARGO's exclusive print ribbons offer the latest in ribbon technology:

- FARGO's Pro-L print ribbons feature Smart Sensing Cores which detect if the wrong ribbon is installed and promptly display an error message to help prevent card waste.
- FARGO's HDP™ (High Definition Printing™) and DTC™ (Direct-to-Card) print ribbons feature revolutionary RibbonTraq™ technology that quickly calibrates

the ribbon without scrolling through numerous ribbon panels, thus speeding production and eliminating waste. In addition, RibbonTraq alerts you if the wrong ribbon has been installed to help you avoid printing errors.

- FARGO's new DTC resin ribbons feature exclusive RFID (Radio Frequency Identification) technology. RFID senses if you have the correct ribbon installed, indicates the number of prints remaining and alerts you when the ribbon runs low to minimize guesswork and downtime.

Three ribbon types for all printing needs

Dye-Sublimation Ribbons

- YMC ribbon – Smoothly blends up to 16.7 million colors to produce photo-quality images.

- BO ribbon – Ideal for money-saving monochrome applications such as printing smooth black and white photos, text and visible-light-readable bar codes.

FARGO's revolutionary RibbonTraq technology accurately tracks each panel on the ribbon during printing, speeding production and eliminating waste.

Dye-Sublimation/Resin Combination Ribbons

- YMCK, YMCKO, YMCKK, YMCKOK ribbons – Perfect for printing full-color cards with resin black text and visible-light and infrared-readable bar codes.
- Ribbons with two resin black (K) panels for fast, efficient dual-sided printing.

Dye-Sublimation Ribbons					
		DIRECT-TO-CARD PRINTERS			HIGH DEFINITION PRINTERS
Type	Number of Images	DTC510/515 520/525	DTC720	Pro-L	HDP710/720

BO	1000	86011	86011		

Ribbon color codes These letter codes indicate the type of ribbon panels on a particular FARGO ribbon: Y= Dye-Sublimation Yellow, M= Dye-Sublimation Magenta, C= Dye-Sublimation Cyan, K= Resin Black, O= Clear Resin Overlay, B= Dye-Sublimation Black

Resin Ribbons

Resin ribbons are the economical solution for printing durable, single-color cards with sharp text and clear, crisp bar codes. A variety of standard and metallic ribbon colors are available along with a unique scratch-off ribbon for specialty applications.

FARGO offers resin ribbons in many colors for fast, money-saving monochrome printing.

Resin Ribbons

Scratch-off	1000	86120	86120	82274

HDP Film

FARGO's new HDP Card Printers use dye-sublimation ribbons to print full-color images onto a unique, clear HDP film. The film is then transferred to the card through heat and pressure. This revolutionary technology significantly enhances card durability and consistently produces the best

card color available – even on tough-to-print matte finished cards, proximity cards and smart cards.

HDP Film		
Type	Number of Images	HDP710/720
HDP Film*	1250	84033

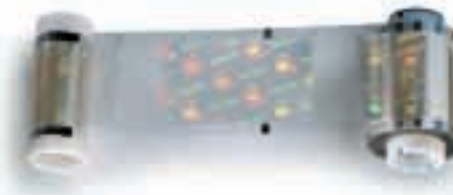

*HDP film to be used in conjunction with dye-sublimation ribbons part numbers 84010, 84016, 84011, and 84013

FARGO Overlaminates – an extra layer of protection

If advanced card security and durability are your concerns, FARGO's clear and holographic overlaminates are your solutions. Our patented, industry-leading laminating technology is designed to give you the ultimate in card protection. Two types of overlaminates are available:

- PolyGuard™ Overlamine – 1 mil and .6 mil thickness provide extraordinary protection.
- Thermal Transfer Overlamine – .25 mil overlay enhances card security and durability.

Overlamine Ribbons		
		DIRECT-TO-CARD PRINTERS
Type	Number of Images	Pro-L
Thermal Transfer Overlamine		
Clear	500	81780
Hologram ("Globe" Design)	500	82226
CR-80 Size PolyGuard Overlamine		
0.6 mil thick, Clear	250	81783
0.6 mil thick, Hologram ("Globe" Design)	250	82222
1.0 mil thick, Clear	125	81784
1.0 mil thick, Clear	250	81789
CR-90 Size (Hologram available – special order)		
0.6 mil thick, Clear	125	81793
1.0 mil thick, Clear	125	82228

Custom designs, patterns or logos may be added to PolyGuard and Thermal Transfer Overlaminates for added security and design possibilities.
