

Photo ID Software For Network Environments

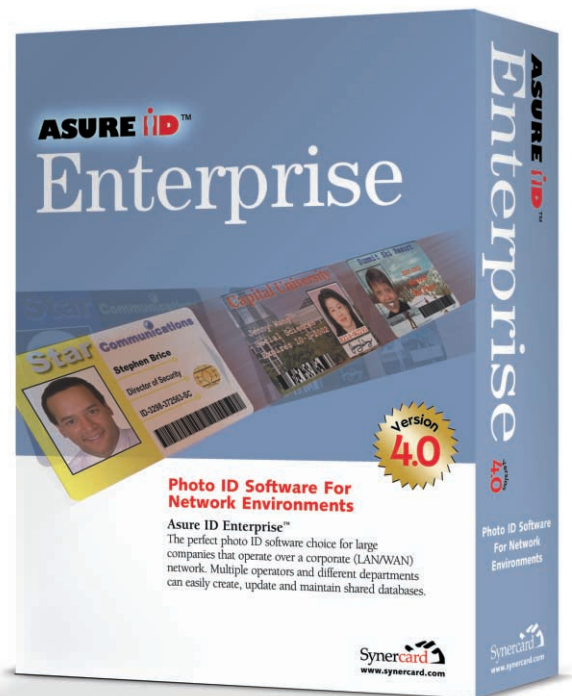

ASURE ID™

Enterprise

Asure ID Enterprise™ is the perfect photo ID software choice for large companies that operate over a corporate (LAN/WAN) network. Multiple operators and different departments can easily create, update and maintain shared databases.

Key Features

- Runs on MS Windows 95, 98 NT4.0, ME, 2000 and XP
- Smart card based secure system access with user definable privileges and passwords
- Configurable single, batch and multi card per sheet printing
- Custom configurable quick find utility. Supports both manual and automated reader entry
- Encodes barcodes (including PDF417 and Datastrip), magstripes and smart chips
- Easy drag & drop (WYSIWYG) design tools with chromakey and ghosting support enables professional looking cards with customized backgrounds and logos
- Conditional display can be set on any field including logos, backgrounds, frames and even barcodes
- Captures photos with any TWAIN compliant device and stores multiple photos, signatures and fingerprints per cardholder record
- Custom report writer with dossier printing
- Import and Export to and from any ODBC compliant database with easy to use wizards
- Full support for network configuration over a corporate (LAN/WAN) network with native support for MS SQL Server™ 7.0 and 2000 for improved security, larger database capabilities and better network management
- Cost effective site licensing program for large organizations that require multiple data capture and viewing stations
- Card records can be securely sent via the Internet in a "ready to print" format to an Asure ID Card Service Bureau for primary or backup card printing
- Available in multiple languages with QuickStart Guide for easy setup

Asure ID Enterprise™ is part of the Asure ID Family Of Products™ which offers a complete line of Internet enabled photo ID software products that are simple to learn, more powerful, loaded with useful features and flexible enough to improve the issuance of photo ID cards for virtually any size and any kind of enterprise.

Creating, Managing And Producing Photo ID Cards Has Never Been This Easy, Powerful, Flexible Or Affordable!

ASURE ID™

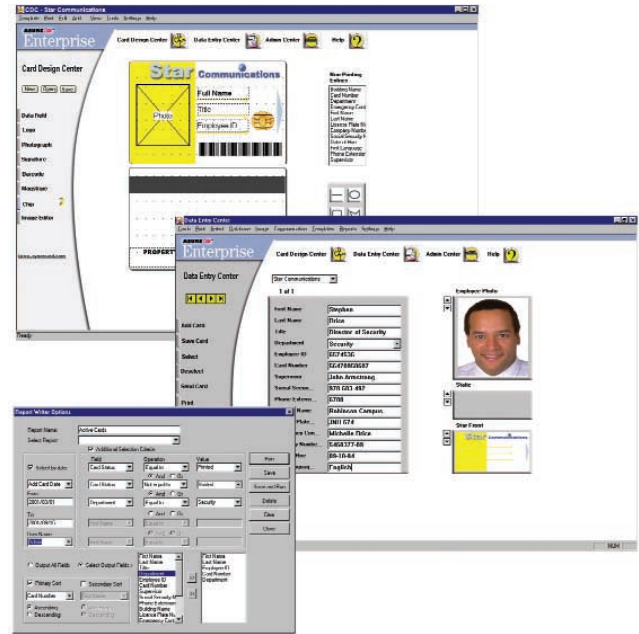

Enterprise

More Powerful Features!

Asure ID Enterprise™ is the result of Synercard's research into the needs of photo ID software users. They told us what features they'd like to see and we built a product they love to use. Using Asure ID Enterprise's advanced networking and database tools users can easily create, edit and view records that are shared on a corporate database between multiple operators and different departments.

High End Performance Without The High End Price.

While Asure ID Enterprise incorporates the power, features, security and flexibility of a high end photo ID software product, its price is anything but high end. It was designed to be cost competitive while also incorporating leading edge features such as the ability to encode contact and contactless smart cards as well as being one of the only software programs that allows encoding facial images in Datastrip's 2D barcode symbology

What's In The Box

- Asure ID Enterprise CD
- Smart Card
- Smart Card Reader
- Install Notes
- QuickStart Guide

Minimum System Requirements
